How to check for new channels...

With the new Freeview HD TV guide iPhone app you can plan ahead to catch your favourite shows in HD. To get this phone app.

- Search on your iPhone or iPod Touch for 'Freeview HD TV Guide app'
- Press on the green install button.

We're always growing the Freeview family tree by adding new channels. So to make sure you're getting all the Freeview channels, just rescan your digital box or TV. It's easy... some digital boxes and TVs rescan automatically and others need to be manually rescanned. To manually rescan you need to press 'Menu' on your remote control and follow the on-screen instructions or those printed in your manual. A typical sequence is:

- Press MENU on your remote control
- From the Menu options, select the 'Tuning Menu'
- Select 'Auto Setup' or 'Update' to rescan your digital TV*

(*also referred to as 'Update', 'Retune', 'Replace' or 'Store Channels')
